ISKCO
PIPE & TUBES

COMPANY BROCHURE 2026

People. Process. Precision.

Steel pipes, tubes and structural sections made in Raipur.

COMPANY STORY

Built on resolve. Growing through precision.

ISKCO began in Raipur with a clear idea: dependable steel starts with dependable people. From raw-material selection to final dispatch, every stage is shaped by disciplined processes, verified testing and a practical understanding of how steel performs in the field.

OUR MISSION

**Manufacture with
discipline.
Serve with clarity.**

Deliver dependable steel pipes and tubes through controlled processes, verified testing, skilled people and responsive customer service.

OUR VISION

**A trusted national
steel-solutions partner.**

Support infrastructure and industry with responsible innovation, consistent quality and relationships built for the long term.

OUR PRODUCTS

One complete range. Many ways to build.

Mild-steel ERW, hot-dip galvanized and special profiles for structural, mechanical, engineering and decorative applications.

MILD STEEL ERW

MS Square Hollow Section

IS 4923 / IS 18573

MILD STEEL ERW

MS Rectangular Hollow Section

IS 4923 / IS 18573

MILD STEEL ERW

MS Circular Hollow Section

IS 1161 / IS 3601

HOT DIP GALVANIZED

HDG Square Hollow Section

IS 4923

HOT DIP GALVANIZED

HDG Rectangular Hollow Section

IS 4923

HOT DIP GALVANIZED

HDG Circular Hollow Section

IS 1239 / IS 1161

SPECIAL PRODUCTS

Railing Tubes

IS 3601 / IS 18573

SPECIAL PRODUCTS

Single Door Frame

Approved specifications

OUR MANUFACTURING PROCESS

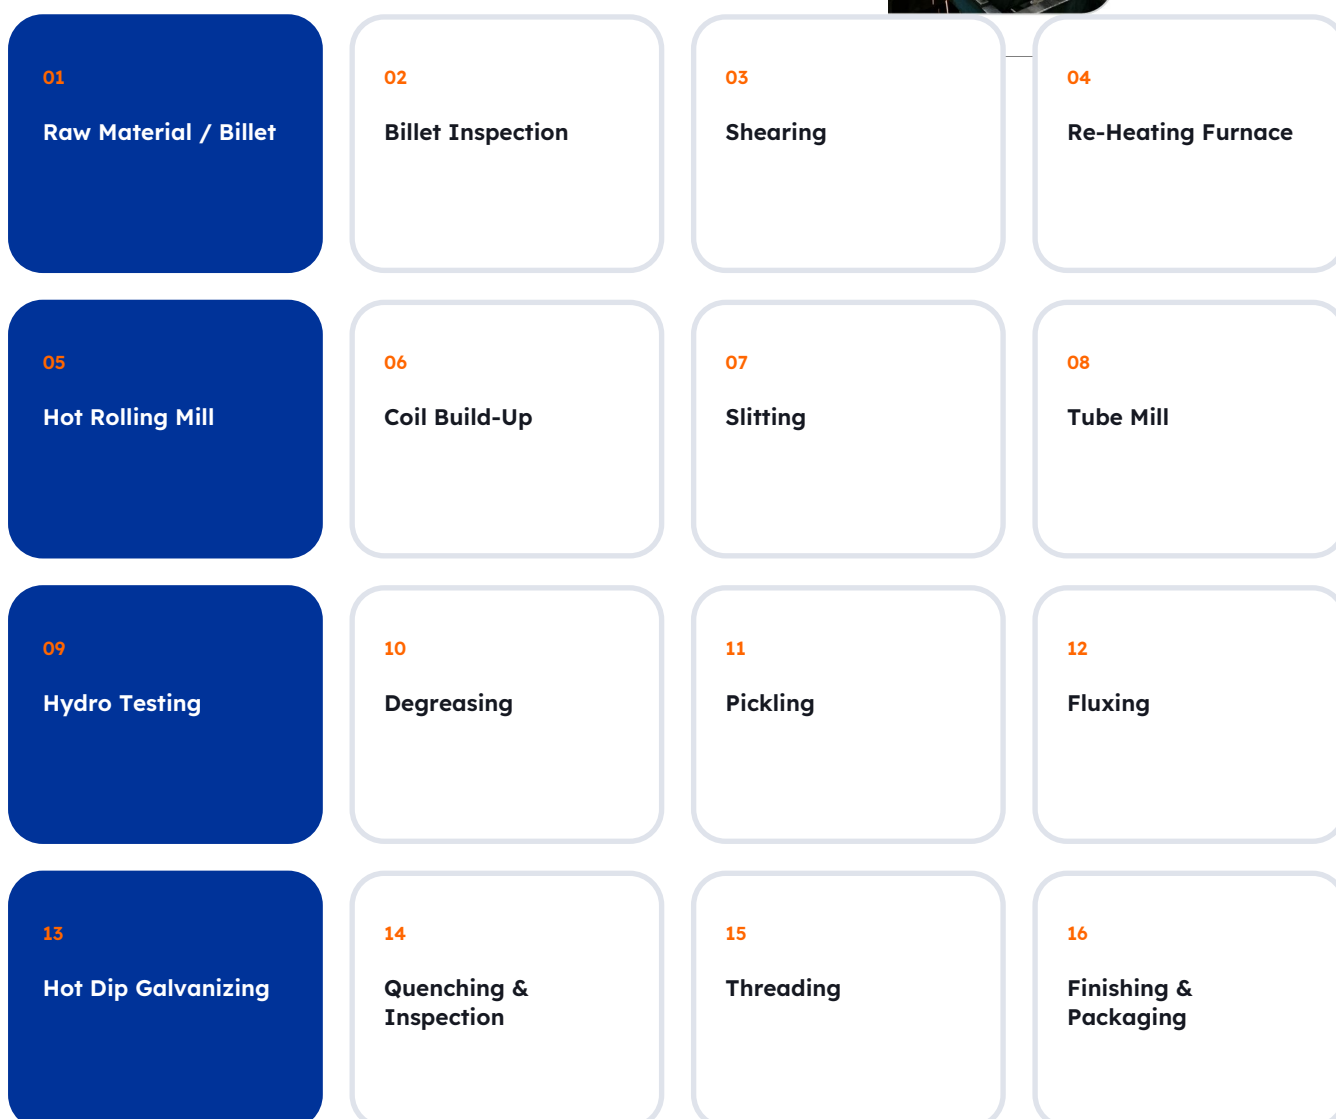

Sixteen connected manufacturing stages.

A documented production flow connecting raw material, forming, testing, galvanizing, finishing and packaging.

Tube Mill

In the tube mill section, slit steel formed into round, square, or rectangular using advanced forming rolls and at the open edges of the formed sheet continuously using the Electric Resist process, which produces strong, uniform joints. The tube mill operation is to maintain dimensional accuracy, a smooth weld finish, and superior mechanical properties of the finished pipes and tubes.

ORIGINAL FLOW CHART

Available as a downloadable PDF on the ISKCO website.

TESTING & QUALITY CONTROL

Checks matched to the product.

Quality control follows material, dimensions, mechanical performance, pressure integrity, coating and finish.

01 MS Billet

Chemical analysis, spectrometer, hardness, dimension, surface and weight checks.

02 MS Strips

Chemical analysis, tensile strength, thickness, width, surface and weight checks.

03 MS Pipes

UTM, hydro, dimension, weld-quality and standard-section weight checks.

04 Galvanized Pipes

Zinc coating, uniformity, adhesion, free bore, hydro, dimension and weight checks.

05 Railing Tubes

Surface finish, bend, dimension and coating or polish checks.

06 Single Door Frame

Dimension accuracy, strength, weld joint and surface-finish checks.

BIS DOCUMENTS

● IS 1239 (Part 1):2004

● IS 1161:2014

● IS 3601:2006

● IS 4923:2017

● IS 18573:2024

● IS 10748:2004

Licence holder and documented validity are shown with each downloadable certificate on the website.
